

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

reference to the date of arrival in spring. The purpose of the list, aside from its faunistic value, is to aid local observers in their field studies of birds.—J. A. A.

Cole on Birds from Yucatan.¹—The collections forming the basis of the present paper were made at Chichen-Itza, Yucatan, by Mr. Cole, from February 13 to April 9, 1904, the observation and collection of birds being "rather incidental to the other collecting." The present list is intended "to include every species of bird known to have been definitely reported from Chichen-Itza," and numbers 128 species. The list is based on four sources of information: (1) birds collected by the author; (2) easily recognizable birds (2 in number) added on the authority of Mr. E. H. Thompson, U. S. Consul, owner of a large plantation at Chichen-Itza; (3) a collection of skins (84 specimens, representing 53 species) made by Mr. Thompson in the early nineties; (4) records from other sources, including Mr. F. M. Chapman's list² of 74 species, obtained by him at Chichen-Itza in March, 1896. This is an increase of 54 over Mr. Chapman's list, while 10 of those listed by Mr. Chapman are here given on his authority. A supplemental list of 13 species is given of birds collected or observed elsewhere in Yucatan, not yet reported from Chichen-Itza.

The annotations include, besides the usual field notes, the Maya names, and reports, in the case of a number of species, on the contents of stomachs by Mr. F. S. Millspaw. *Otus choliba thompsoni* is described as new. While *Otus* seems properly to replace *Megascops*, the use of *Asio* in place of *Bubo*, as here and by other writers who are ambitious to be up to date in names, is a little premature, a recent decision on these names by the A. O. U. Nomenclature Committee being to the effect that *Bubo* and *Asio* are entitled to their time-honored associations. Mr. Cole's list is an excellent summary of our present knowledge of the bird-life of Chichen-Itza.—J. A. A.

Proceedings of the Delaware Valley Ornithological Club.—'Cassinia, a Bird Annual,'³ contains, as usual, much of interest relating to the ornithology of Pennsylvania and New Jersey. The opening paper (pp. 1-9) is a biographical sketch of William Bartram, by George Spencer Morris, illustrated with a portrait of Bartram, and a drawing of 'The Bartram House, Bartram's Garden, Philadelphia,' by the author of the paper.
